

## **Plant Cutting Technician**

Qualterra, Inc. is seeking a Plant Cutting Technician to join our Plant Production team.

### **Overview**

The world is in a dire situation. By 2050, there will be 10 billion people on the planet to feed with less farmland available than ever before. We need to develop solutions that maximize agricultural productivity while capturing carbon and regenerating soils. Qualterra is on the frontlines of delivering such solutions.

As we approach our next level of company growth, we are looking for passionate teammates that bring experience and insights to help us drive the agricultural and sustainability transformations we seek.

If this is you, please consider applying today.

### **The Plant Production Team**

Qualterra's Plant Production is responsible for producing the highest quality fruit tree and vine rootstock for the agriculture industry.

### **The Role**

This position involves the responsibility of moving the plantlets through a detailed tissue culture process in a controlled and sterile environment. We are looking for a full time employee, 40 hours a week. Working hours are 9-5.

### **Reports to**

Director of Plant Production

### **Responsibilities**

- Cutting and transferring plants using sterile technique in accordance with tightly defined protocols
- Equipment care and cleaning
- Maintaining computer records of work

### **Experience and skills**

- High school diploma or GED
- Prior experience with plants.
- Ability to perform high volume, repetitive, work requiring manual dexterity, precision, and attention to detail.
- The ability to closely adhere to standard operating procedures and sterile environments.
- Laboratory experience is a plus.
- The ability to collaborate effectively and communicate clearly in close proximity to others
- Excellent time management skills and the ability to manage stress that can be associated with tight deadlines and high-volume throughput
